UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
REGION III  
841 Chestnut Building  
Philadelphia, Pennsylvania 19107

SUBJECT: Notice of Intent to Delete  
AMP Site, Glen Rock, PA

DATE: JUL 08 1996

FROM: Thomas C. Voltaggio, Director  
Hazardous Waste Management Division (3HW00)

TO: W. Michael McCabe  
Regional Administrator (3RA00)

I recommend that you sign the Notice of Intent to Delete the AMP Site from the National Priorities List ("NPL"). This site is being proposed for deletion under EPA's March 1995 policy stating that the Agency would delete sites where cleanup is proceeding under RCRA corrective action. After this site was placed on the NPL, AMP, Incorporated ("AMP") completed an investigation and evaluation of cleanup options for the site under a RCRA Administrative Consent Order ("ACO"). Based on this information, EPA issued a RCRA Record of Decision requiring pumping and treating the groundwater to address VOC contamination, operating an infiltration trench, and monitoring groundwater and surface water at the site. AMP entered into a second ACO to implement this remedy and is currently operating the system in compliance with the ACO.

The deletion of the AMP Site from the NPL will clarify that EPA Region III's Office of RCRA Programs will have primary responsibility for ensuring that appropriate remediation takes place. This deletion does not prevent the Agency from taking future Superfund-financed action at the site if warranted.

The Pennsylvania Department of Environmental Protection has concurred with this proposed deletion.
